PROJECT

HTML Mockup

Dear Gofran,

This is a great submission for the HTML mockup page.

Your code is well structured and shows strong understanding of HTML/CSS concepts.

There are some improvements that I would like you to work on for your project to meet specifications. They are in **blue** text in your evaluation below.

Good Luck. Feel free to email me if you have any questions. I look forward to your resubmission.

Best,

Poornima

Design**Meets Specifications**

- The DOM tree correctly represents the page content.
- Page elements use semantic tags where appropriate.
- Design uses grid-based layout principles.

Responsiveness**Does Not Meet Specifications**

- Portfolio is responsively designed.
- Portfolio does not render appropriately on one or more of the three required various devices [iPad, Nexus 5 phone, and laptop]
 - The Udacity logo, title and slogan overlap when the Chrome browser window is overlapped. (When width < 890px)
 - Make sure the logo, title and slogan are responsive to different dimensions of the browser.

Separation of Concerns

Meets Specifications

- Page completely separates structure (HTML) from design/style (CSS).

Code Quality

Does Not Meet Specifications

- Code is formatted to align with the Google HTML/CSS style guide (located [here](#)).
 - Code contains trailing white spaces.
 - CSS - Not all block content is indented.
 - Additional new lines that show up as trailing whitespaces need to be removed (in HTML and style.css files)

PROJECT EVALUATION

Project Does Not Meet Specifications
